Professional Management Courses

Project Management Professional

In Project Management the students will learn the skills how to successfully manage projects in different organizational structures. This is complimented with another business process training track. Students who complete all assessments will be awarded a certification of completion.

PMI-Agile Practitioner®

This training will validate students' ability to understand agile principles and concepts. Students will be able to demonstrate to employers and project stakeholders that the use of agile is among their project management skills, and they can apply its techniques based on the needs of their project.

Project Management and Business Processes

This training consists of Project Management and one of the Business Processes Training (Six Sigma Green Belt or Black Belt) or ITIL (Information Technology Infrastructure Library), or CBAP (Business Analysis Professional) or PMI-ACP or PMI-RMP (Project Management Institute– Risk Management Professional) or PMI-SP (Project Management Institute-Scheduling Professional).

Six Sigma Green Belt®

Six Sigma Green Belt training provides participants with enhanced problem-solving skills, with an emphasis on the DMAIC (Define, Measure, Analyze, Improve and Control) model.

Six Sigma Black Belt®

Six Sigma Black Belt consists of different phases such as, Define, Measure, Analyze, Improve and Control phase. The role of Six Sigma Black Belt is to assist management in producing the most value with the minimum amount of resources, in achieving efficiency.

Business Analysis Professional (BAP®)

This program provides comprehensive training on building, documenting, communicating, and managing requirements. A Business Analysis Professional is the key facilitator within an organization, acting as a bridge between the client, stakeholders, and the solution team.

Assistant Project Management (APM®)

Assistant Project Management is a valuable entry-level training for project practitioners, designed for those with little or no project experience. The APM® demonstrates an individual's understanding of the fundamental knowledge, terminology and process of effective project management.
